

# Alexander SPK™

System Crash Management for MS Windows® 2000/XP Single PCs

**Avoid the High Cost  
Of Downtime**

**Pinpoint System Crash  
Cause Automatically**

**Simple Viewer Manages  
All Crash Events and Data**

**Resolve in Minutes  
What Often Takes Months**

The frustration of system failures (aka: crashes, blue screens, etc.), long the bane of computer users, can now all but disappear. Installing the Single PC Edition of the Alexander SPK Windows (System Protection Kit), provides dramatic savings in time, frustration, and in the case of many, of money. From the SPK's ability to report the cause of a PC crash to the fact that operation is automated, the SPK will simplify your crash resolution. All in all, the Alexander SPK will help ensure that your work will go more smoothly and that your downtime is minimized.

This Single PC Edition of the SPK contains several software modules that automatically manage your PC during system crash events. It will ensure that crash data is captured and that the system is restarted without human intervention. It will alert you with a message popping up over your work area on the screen and offers to display the SPK

Crash Report which pinpoints the faulty software. With the cause known, resolution is made simple. By solving the cause after the *first occurrence* prevents numerous repeat crashes.

This is the first system crash management kit for Windows PCs. Based upon the Enterprise Edition for Windows Server and Workstation networks, the SPK Single PC Edition has a legacy dating back to 1991 when Alexander LAN began developing crash management utilities. The Alexander SPK, in its various forms, has long been used the world over

and remains the first and only true crash management utility. Now this power is ready for your single PC.

#### Alexander SPK Single PC Benefits

- Automatically pinpoint crash cause
- Proactively reduce system downtime
- Restores ailing systems automatically
- Prevents costly downtime
- Eliminates costly diagnostic time
- Simple to set up and use: fully automated

**Single PC License: \$39**
